DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claim 1, 8 and 9 are rejected under 35 U.S.C. 102(a) as being anticipated by the admitted prior art.

As stated in the admitted prior art of Fig. 2B a switching engine **210** identifies and routes transactions to a PCI-to-PCI Bridge **170** (bridge) or PCI Devices **160,180** (non-bridge) via PCI-to-PCI Bridge Secondary Port **230b** (first secondary port) and Secondary Ports **220b, 240b** (plurality of end device ports).

With respect to claim 8, peer-to-peer transactions are inherent in the PCI Local Bus Specification, Revision 2.2 that is incorporated by reference in the admitted prior art.

With respect to claim 9, transactions can be routed from CPU **100** to PCI Devices **160,180** or PCI-to-PCI Bridge **170** which is considered a downstream direction.

Allowable Subject Matter

5. Claims 10-17 are allowed.

Art Unit: 2661

6. Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Porterfield discloses a method of configuring a computer system with bus bridges using shadow registers.
